Overview

Cisco 2800 Integrated Services Routers extend Cisco Systems' leadership in multi-service routing by providing customers with unparalleled network agility, performance, and intelligence. By transparently integrating advanced technologies, adaptive services, and secure communications into a single, resilient system Cisco 2800 routers offer simplified deployment and management, help lower the costs and complexities of your network, and provide enhanced investment protection.The integrated services routing architecture of the Cisco 2800 product family builds on the Cisco 2600 Series Multiservice Access Routers and adds embedded security processing, significant performance and memory enhancements, and new high-density interfaces that deliver the performance, availability, and reliability required for scaling mission-critical business applications in the most demanding enterprise environments.Cisco 2851 router Integrated Services Routers are designed to meet both performance and density requirements for the delivery of secure, concurrent services for midsize businesses, small and medium-sized enterprise branch offices, and service provider managed services applications without compromising router performance.

Specification

Cisco 2851 Router 2800 Series ISR	
Manufacturer	Cisco Systems, Inc
Manufacturer Part Number	CISCO2851
Product Type	Cisco 2851 Router
Form Factor	External - modular - 2U
Dimensions (WxDxH)	43.8 cm x 41.7 cm x 8.9 cm
Weight	11.4 kg
DRAM Memory	512 MB (installed) / 1 GB (max) - SDRAM
Flash Memory	128 MB (installed) / 256 MB (max)
Data Link Protocol	Ethernet, Fast Ethernet, Gigabit Ethernet
Network / Transport Protocol	IPSec
Remote Management Protocol	SNMP 3
Features	Modular design, firewall protection, hardware encryption, VPN support, MPLS support, URL filtering, 256-bit encryption
Compliant Standards	IEEE 802.3af
Power	AC 120/230 V (50/60 Hz)
